

Q&A

1. Are you seeking for the bidding organization company to provide fulfillment services in stock or will you be stocking these yourselves?

A: No. We will identify local representatives to stock the machines.

2. Are you asking that not only do we supply just the general maintenance of the machine and the training installation but also requesting the company actual supply Naloxone and then stocking of the machine or are you going to be securing the naloxone and stocking the machines yourself?

A: We will identify local representatives to be trained on how to stock the machines. We will be asking the selected vendor to be responsible for training identified representatives on steps to stock the machine properly.

3. Will all six sites that have been selected be indoor or outdoor sites?

A: At least one location will be outdoors so we will be looking to get pricing for both an indoor and outdoor machine.

4. Is there any demographic data or any sort of other information that needs to be captured at the time of transaction?

A: After consultation with other jurisdictions with Harm Reduction vending machines we have decided we do not want to collect any demographic data. We just want people who want or need supplies in the machines to have free access.

5. Do you have any need for using API, or that type of integration for running different reports?

A: No. We would like the vendor to run reports and send to our agency.

6. Is there going to be a graphic wrap or branding that should be included in the quote?

A: Yes.
